Composition / Treatment

MICROFIBER 100% PES - 148 gr/m²

Available colors

115

Reference: 212700-115 · TURQUOISE

Description

This blouse features a special print dedicated to Autism Spectrum Disorder (ASD). The design aims to raise awareness and promote understanding and acceptance of ASD in society. It is a beautiful way to show support and solidarity with the autistic community.

The blouse is made of antibacterial microfibre, which is 100% polyester. This material is known for its softness, lightness and resistance to bacterial growth, making it a hygienic choice for the school and clinical environment. Fabric resistant to splashes of bleach diluted in water.

The sleeveless design offers comfort and freedom of movement, which is essential for professionals who spend long hours working with children and adults on the autistic spectrum.

The top closes easily with a front zip. This makes it easy to dress and undress, which is important in situations where speed and ease are needed.

The darts on the sides and back provide a flattering and comfortable fit. They also contribute to the professional appearance of the garment.

The blouse has an inside pocket on the right side. This pocket is practical for carrying small items or essential utensils, such as pens or communication devices, safely and discreetly.

This blouse has been designed with education professionals in mind, such as teachers and educators, as well as caregivers working in nursery schools and specialised centres.

Available sizes

XS S M L XL XXL
