274 275

Reference: 448300-274 · VICHY BAMBULA ANTIBACTERIAL FUCHSIA

Description

This cap is made of ANTIBACTARIAN BAMBULA, a fabric that has been treated with a biocide finish. This prevents the proliferation of bacteria, making it a hygienic and safe option for use in professional environments.

In addition to its antibacterial properties, Bambula Antibacterial has a water-repellent treatment. This means it is water resistant, making it even more suitable as a protective barrier in environments where extra hygiene is required.

It is available in various colours, including light blue, fuchsia and pistachio. This allows professionals to choose a colour to suit their personal preferences or the uniform standards of their workplace.

It has an elasticated back for a comfortable and secure fit on the head. It also features side buttons that are useful for attaching mask bands, helping to maintain a professional and neat appearance.

In addition, it is a versatile garment and suitable for a wide range of professionals. It is ideal for nurses, doctors and other healthcare workers, as well as educators and teachers in nursery schools and kindergartens. It is also suitable for cleaning staff, cooks and shop workers in general.

Available sizes
