Composition / Treatment

Outer layer POLYURETHANE 80 gr/m² - Inner layer INTERLOCK 50 gr/m²

Available colors

101

Reference: 486300-101 · BLANCO

Description

These leggings are made from 80 grams per square metre (80gr/m²) polyurethane with a 50 grams per square metre (50gr/m²) interlock inner layer. This high quality fabric is not only durable but also water-repellent, making it an effective shield against liquid splashes.

Resistance to microbial penetration in wet environments is a key feature. These leggings protect not only against spills, but also against the penetration of harmful micro-organisms, maintaining a safer working environment.

Durability is essential, and these leggings can be reused in up to 40 wash cycles at 90 degrees. This high degree of reusability not only saves costs in the long run but also contributes to sustainability.

Despite their strength and durability, these leggings are comfortable to wear. They easily adapt to the leg, allowing for ample mobility without restriction.

After a wash cycle, these leg warmers dry quickly, which means they are always ready to use.

This makes them an indispensable accessory for uniforms in laboratories, hospitals, clinics, medical centres and the food industry.

Available sizes

UD

Size guide

Measurements may vary slightly due to the production process. The garment is measured flat.

MEASURE (cm)	U
FRONT LENGTH	62
WIDTH DOWN	64
BACK LENGTH	18
WIDTH ABOVE	17

Sketches and characteristics

- UNISEX garment.
- Material: polypropylene.
- Approx. length: 65cm
