Description

The HERNÁN Men's Open Blouse M/L is the ideal choice for professionals seeking comfort, functionality and modern design, without compromising on sustainability. With a semi-fitted H2 cut and a length of approximately 77 cm, this garment offers a balanced silhouette between comfort and structure, perfect for sectors such as healthcare, customer service, laboratories or pharmacies.

It is made from IRIS 74% PES RECYCLED 24% RY 2% EA - 180 gr/m², which provides elasticity, resistance and breathability, ideal for long working days. Furthermore, as it is made from recycled materials, it actively contributes to reducing environmental impact.

Its design stands out for its crew neck, long sleeves with ribbed cuffs for a better fit and protection, and a crossover closure with hidden press studs, which facilitates movement and provides a professional look. The darts on the front optimise the fit and the five functional pockets (one of them with a zip) add practicality. The back yokes with elasticated ribbing ensure superior mobility.
